

NICE

PRODUCT FEATURES

NICE COLD + COMPRESSION DEVICE uses advanced technology to greatly improve the convenience of cold + compression therapy. NICE eliminates inconvenience by delivering precise cold therapy without the need for ice. The programmable pneumatic compression is proven to reduce edema and speed recovery. NICE integrates these highly effective therapies in a small (8x8x8 inches) and lightweight (9lb) package with an easy-to-use touch screen interface.

KEY FEATURES:

- **Iceless** - NICE patients do not need to place ice into the unit.
- **Waterless** - Patient does not have to worry about adding water to the unit once the technician sets up the unit.
- Allows for consistent temperature control ranging from 42° to 58°
- Easy to use "touch control" display screen.
- Allows for easy and immediate control of compression levels
- Allows for timed programmability and overnight utilization.
- Form-fitting wraps designed specifically for each joint

NICE BENEFITS

- **Compliance** - patient much more compliant when no ice/water required.
- **Promote Faster Healing** - decrease edema, improve lymphatic drainage, improved range of motion.
- **Opioids Reduction** - immediate pain relief, reduce pain medication intake.
- **Compression** - allows for zero compression, as well as static or intermittent cold compression that can be controlled at low, medium, and high levels.
- **Mobility** - NICE unit easier to transport sized at 8x8x8 & weighs 9 lbs.
- **Temperature Control** - allows for personal preference on temperature settings since patients have different sensitivity to cold therapy.
- **Safety Feature** - NO Thermal damage since unit cannot go below 42°.
- **Personal Settings** - pre-set programming for "quick start" and overnight sessions.
